DETAILED ACTION

Notice of Amendment

In response to the amendment filed on February 19, 2008, amended claims 67, 85, 87-89 and 92-93 and canceled claim 72 are acknowledged. The following restriction requirement is set forth:

Election/Restrictions

This application contains claims directed to the following patentably distinct species.

Species A) An endoluminal apparatus comprising an elongated main body with first and second sections, wherein the first section may be selectively switched between a flexible and rigid condition and comprises a plurality of nest links substantially all adjacent links having mating surfaces that are in contact with but that are not connected to each other, and the second section is steerable relative to the first section and a scope is extended through a portion of the main body (see claims 67-71, 73-80, 82-84, 92 and 94).

Species B) An endoluminal apparatus comprising a flexible shaft having a first and second section, a lumen within the shaft and a locking mechanism for holding the first section in a selected shape comprising a plurality of tension wires extending through tension wire lumens and at least one pulley operably coupled to the tension wires, an articulation mechanism for maneuvering the second section and a scope extended through a portion of the shaft (see claims 85, 87-91 and 93).

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at

the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

A telephone call was made to Johny Han on May 20, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.
